100g brown
candle

DO WHITE CANDLES BURN FASTER THAN COLORED CANDLES ?

Procedure

The candles were weighed
and marked every half inch.
They were then lit.
The candles were lit
every half inch and the
candles were weighed and
the results were written
down.

Variables

The independent variable was
the color of the candle.
The dependent variable was
the amount of time it took
the candle to burn.

Results

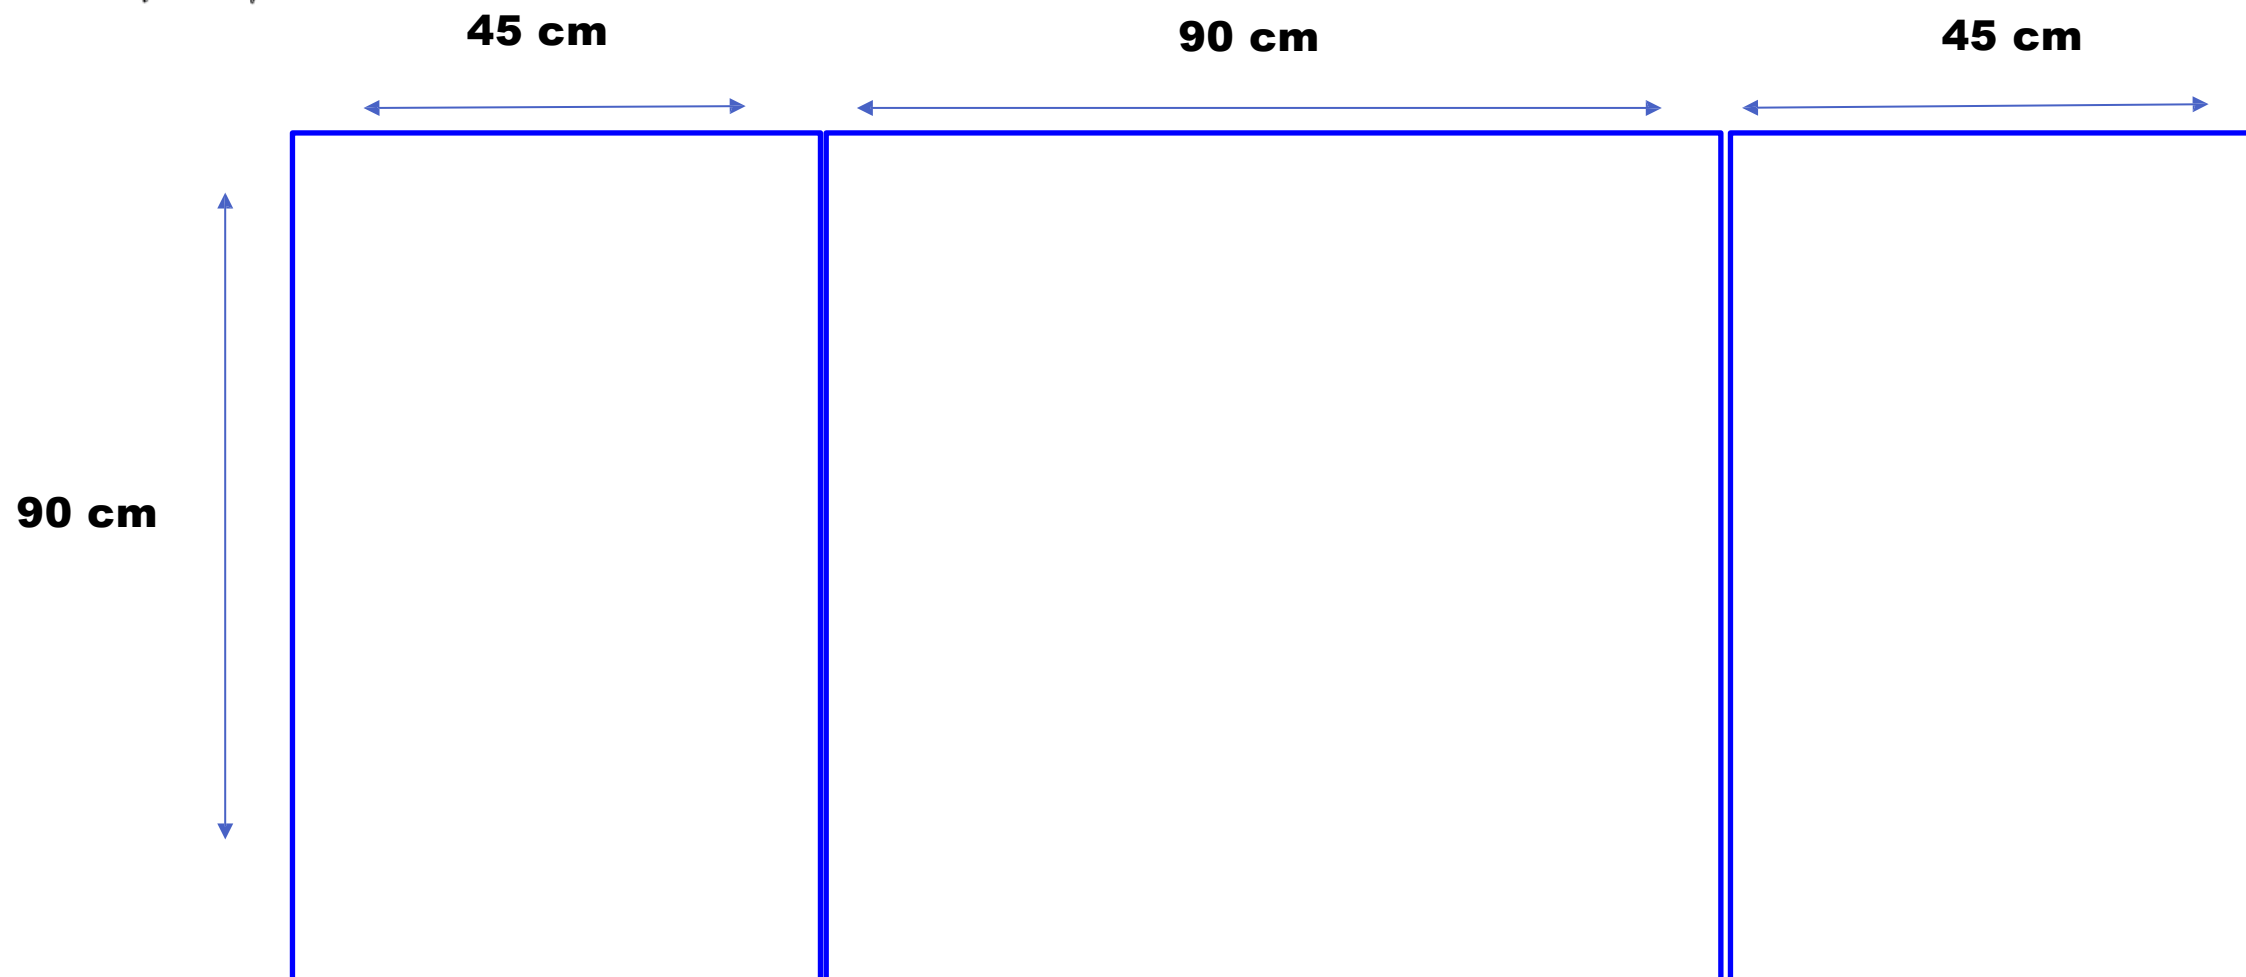

The results of the experiment
showed that the white candle
burned the fastest, followed by
the yellow candle, then the red
candle, then the blue candle,
then the green candle, then the
purple candle, then the pink
candle, then the brown candle.

Conclusion

The results of the experiment
showed that the white candle
burned the fastest, followed by
the yellow candle, then the red
candle, then the blue candle,
then the green candle, then the
purple candle, then the pink
candle, then the brown candle.
